

BUILDING GLOBAL PAYMENT LEADERS OF TOMORROW

India's first industry-led payments and fintech certification partner for universities, bridging the gap between academic curricula and the payments industry.

Powered by Payomatix Technologies.

BUILD FUTURE-READY FINTECH TALENT FOR CAMPUS & INDUSTRY

Payomatix Payments Institute, also known as PPI, is India's specialist institute for payments and fintech workforce development.

We work with universities and colleges to design, deliver, and certify domain-specific payments and fintech programs that help students become job-ready for the modern financial technology industry.

PPI is embedded inside partner universities and colleges, not separate from them. The institution continues to own its academic framework, while Payomatix brings real industry knowledge, trainers, projects, and certification support.

Payomatix is an industry delivery and certification partner, not a degree-granting body. Partner HEIs retain full and exclusive academic authority. All programs align with UGC 2024 and NCfR / ABC frameworks.

WHY PAYMENTS EDUCATION MATTERS NOW

Digital payments are now a core employability skill across banking, fintech, e-commerce, SaaS, consumer technology, lending, compliance, and global finance.

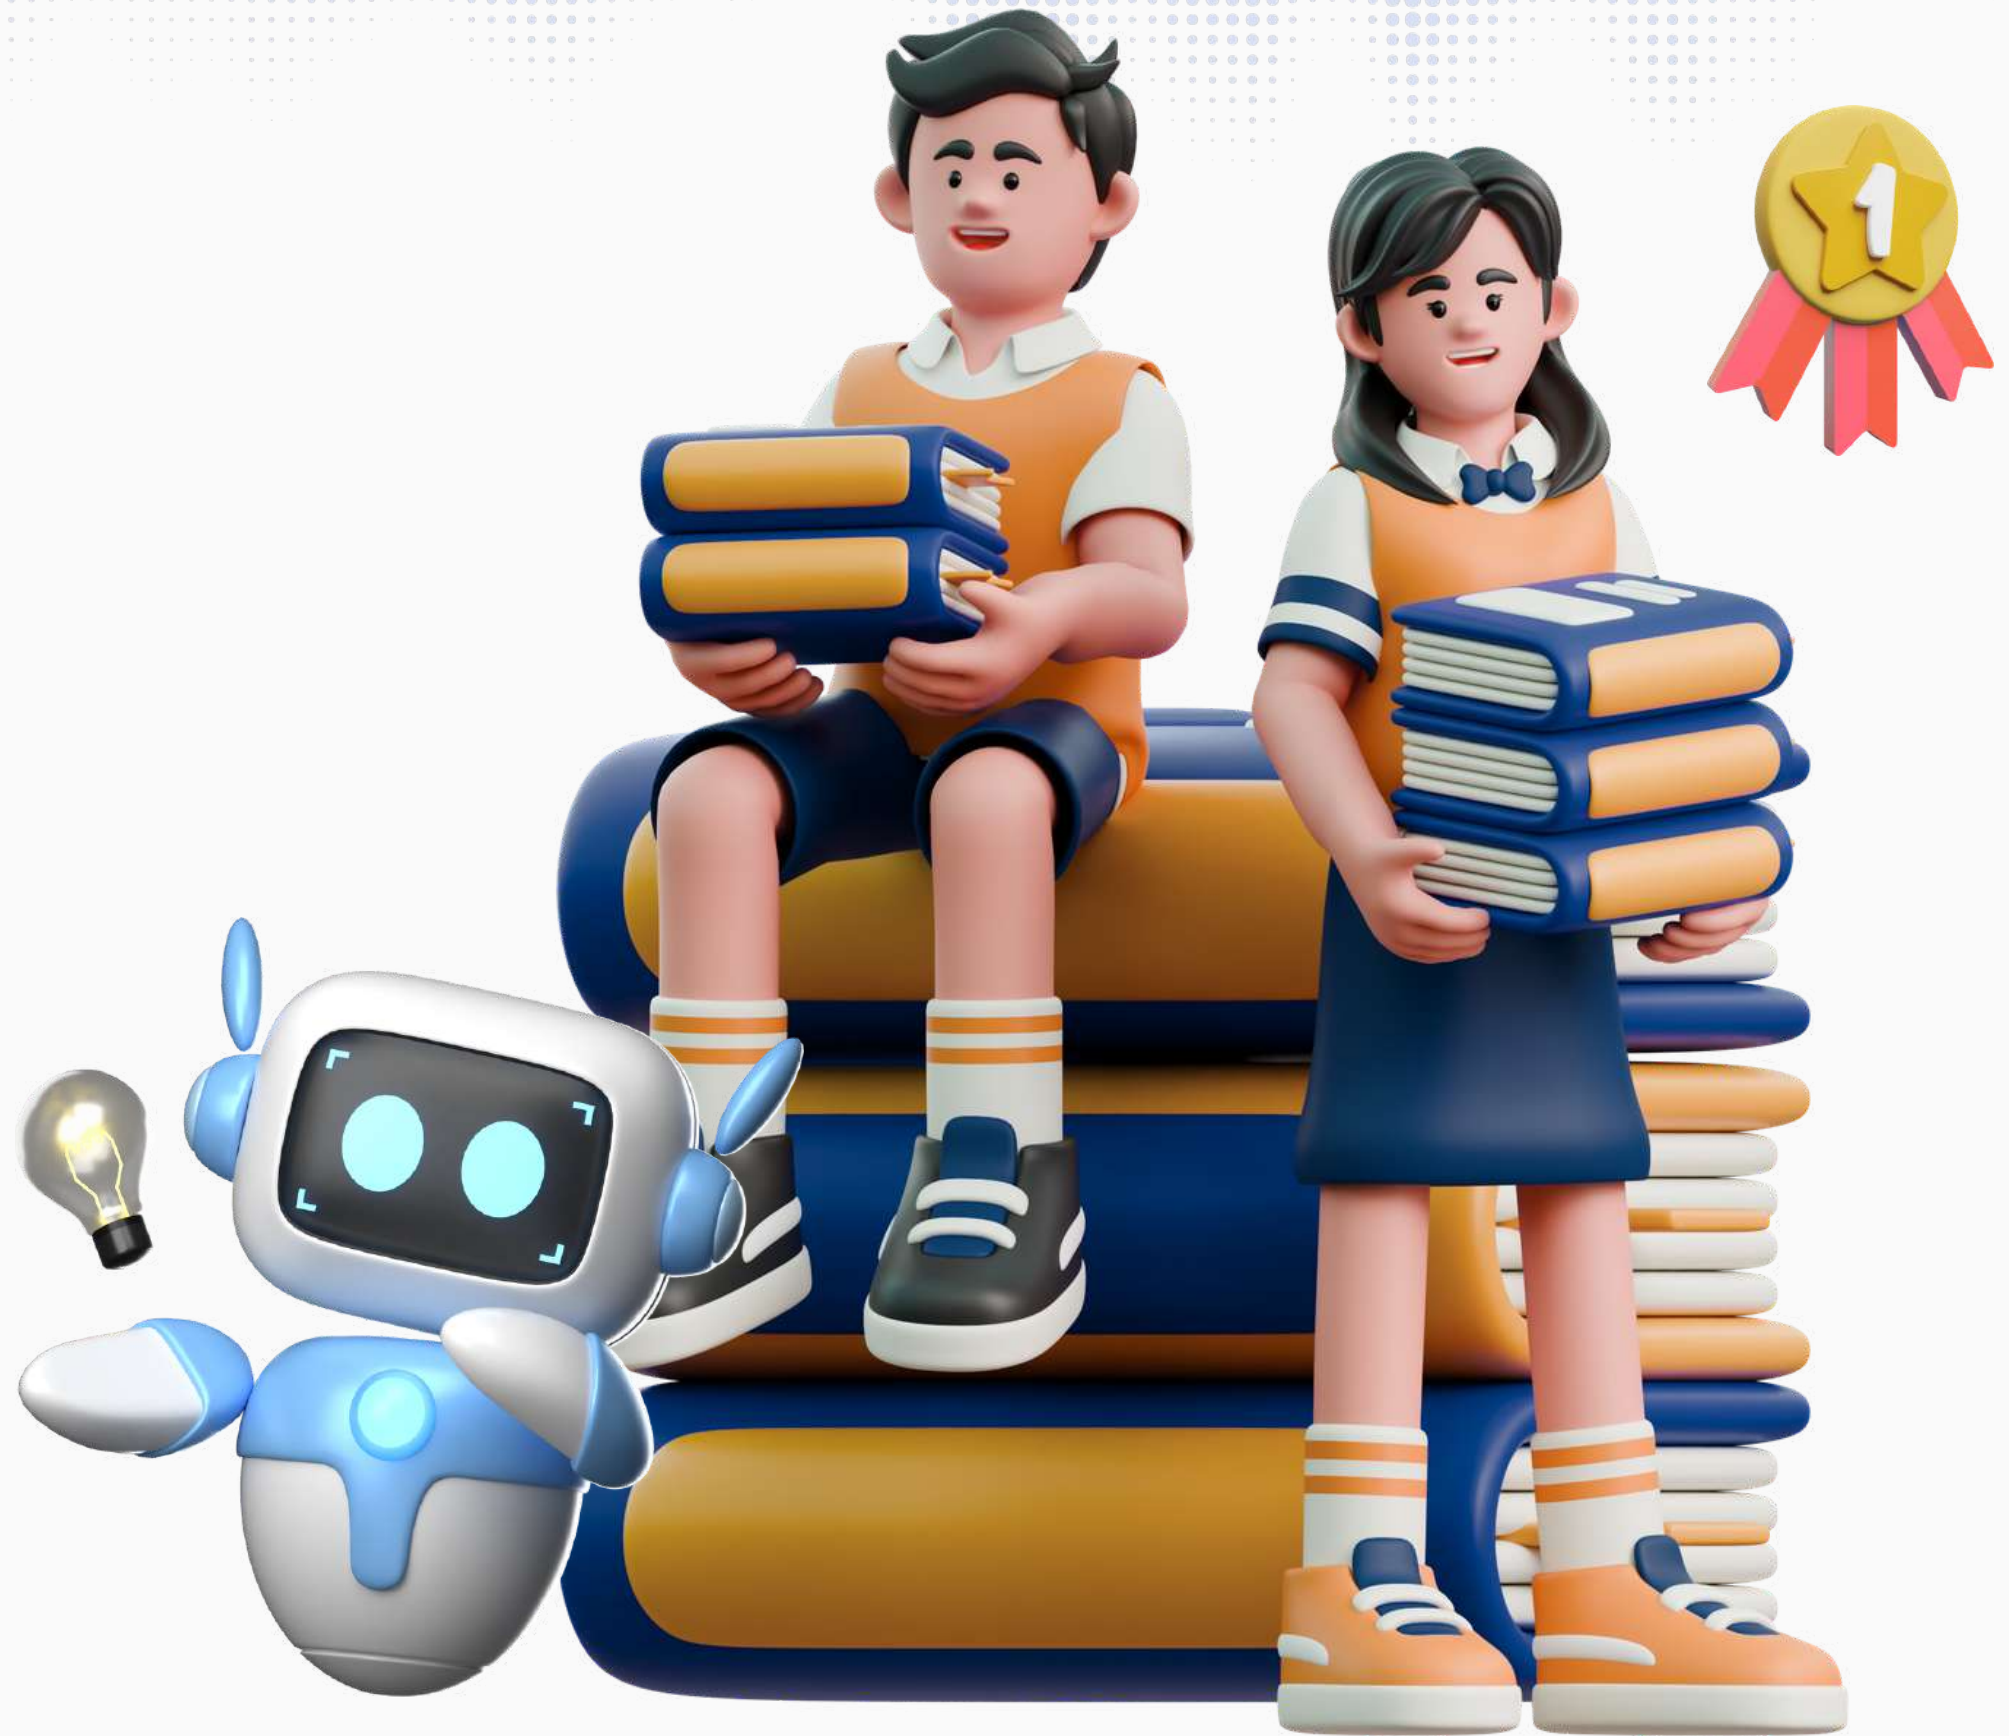

Yet most students graduate without understanding how money actually moves.

They may know business, finance, technology, or law in theory, but they often lack practical exposure to payment gateways, UPI, card networks, settlement cycles, reconciliation, chargebacks, compliance, merchant onboarding, fintech products, and cross-border payment systems.

This creates a clear gap between what colleges teach and what payments employers expect.

PPI was built to close that gap.

We help students understand the real payments industry, build domain confidence, complete practical projects, and graduate with stronger readiness for fintech roles.

www.institute.payomatix.com

+91 9776769666

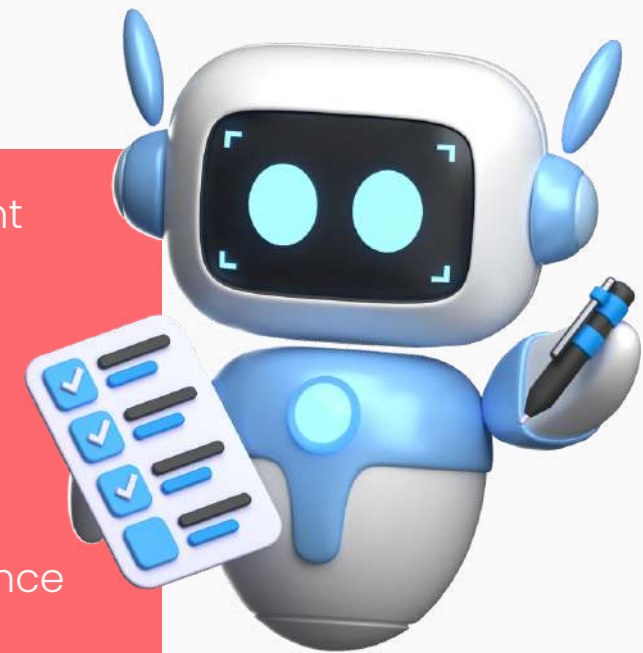

Our goal is simple:

MAKE STUDENTS EMPLOYABLE FROM DAY ONE IN THE PAYMENTS AND FINTECH ECOSYSTEM

Students often lack exposure to:

- How a payment moves from customer to merchant
- UPI, cards, wallets, net banking, and alternative payment methods
- Payment gateways, processors, acquirers, issuers, networks, and orchestrators
- Settlement, reconciliation, refunds, reversals, and chargebacks
- KYC, KYB, AML, PCI-DSS, RBI guidelines, and compliance basics
- Fintech product models such as neobanking, open banking, BNPL, embedded finance, and smart routing
- Career paths inside payments and fintech companies

www.institute.payomatix.com

+91 9776769666

LEARN THE **INDUSTRY**, NOT JUST THE THEORY

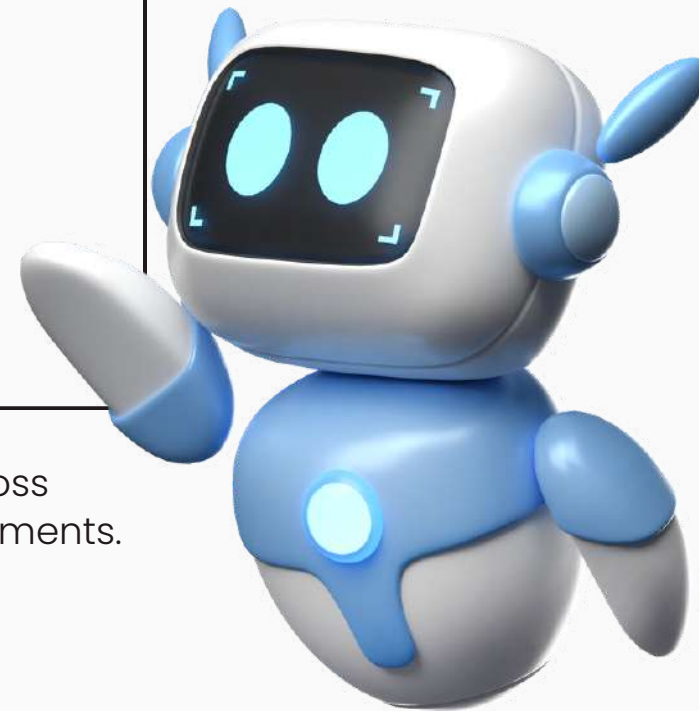

PPI programs are designed around how real payment systems are built, operated, monitored, and improved.

Our learning approach includes:

- Real-world payment infrastructure focus
- Live industry case studies
- Payment gateway and orchestration exposure
- Banking integrations and connectivity
- Compliance and regulatory understanding
- Practical capstone projects
- Career pathway guidance
- Employer-readiness skills

Students learn how payment systems actually work across borders, regulations, technologies, and business environments.

The result is not just awareness.
The result is domain confidence.

BACKED BY A DUBAI-BASED GLOBAL PAYTECH COMPANY

Payomatix Technologies is global payments and fintech infrastructure company with real operational experience across multiple markets. Headquartered in Dubai, one of the world's leading fintech and financial trade hubs.

The company works in cross-border payments, digital banking, payment orchestration, smart routing, white-label gateway solutions, and Banking-as-a-Service infrastructure.

Payomatix is connected to 25+ payment service providers and supports 120+ currencies, giving students exposure to how modern payment systems operate beyond textbooks.

Payomatix Technologies has a presence across Dubai, India, and Canada, with active global exposure across Europe, Africa, the Middle East, and Asia.

This means PPI is not built by a generic training company. It is powered by a live PayTech company working inside the payments ecosystem every day.

DESIGNED AROUND **REAL** PAYMENT SYSTEMS, **REAL** INDUSTRY ROLES, AND **REAL** EMPLOYABILITY OUTCOMES.

We are different because:

1. We are industry-led

Our programs are built by payments professionals, not only academic content writers.

2. We teach real payment infrastructure

Students learn gateways, APIs, routing, risk, settlement, reconciliation, compliance, and cross-border flows.

3. We connect learning to jobs

Each course maps to actual career tracks inside payment gateways, banks, fintech startups, card networks, processors, and global payment companies.

4. We use project-based learning

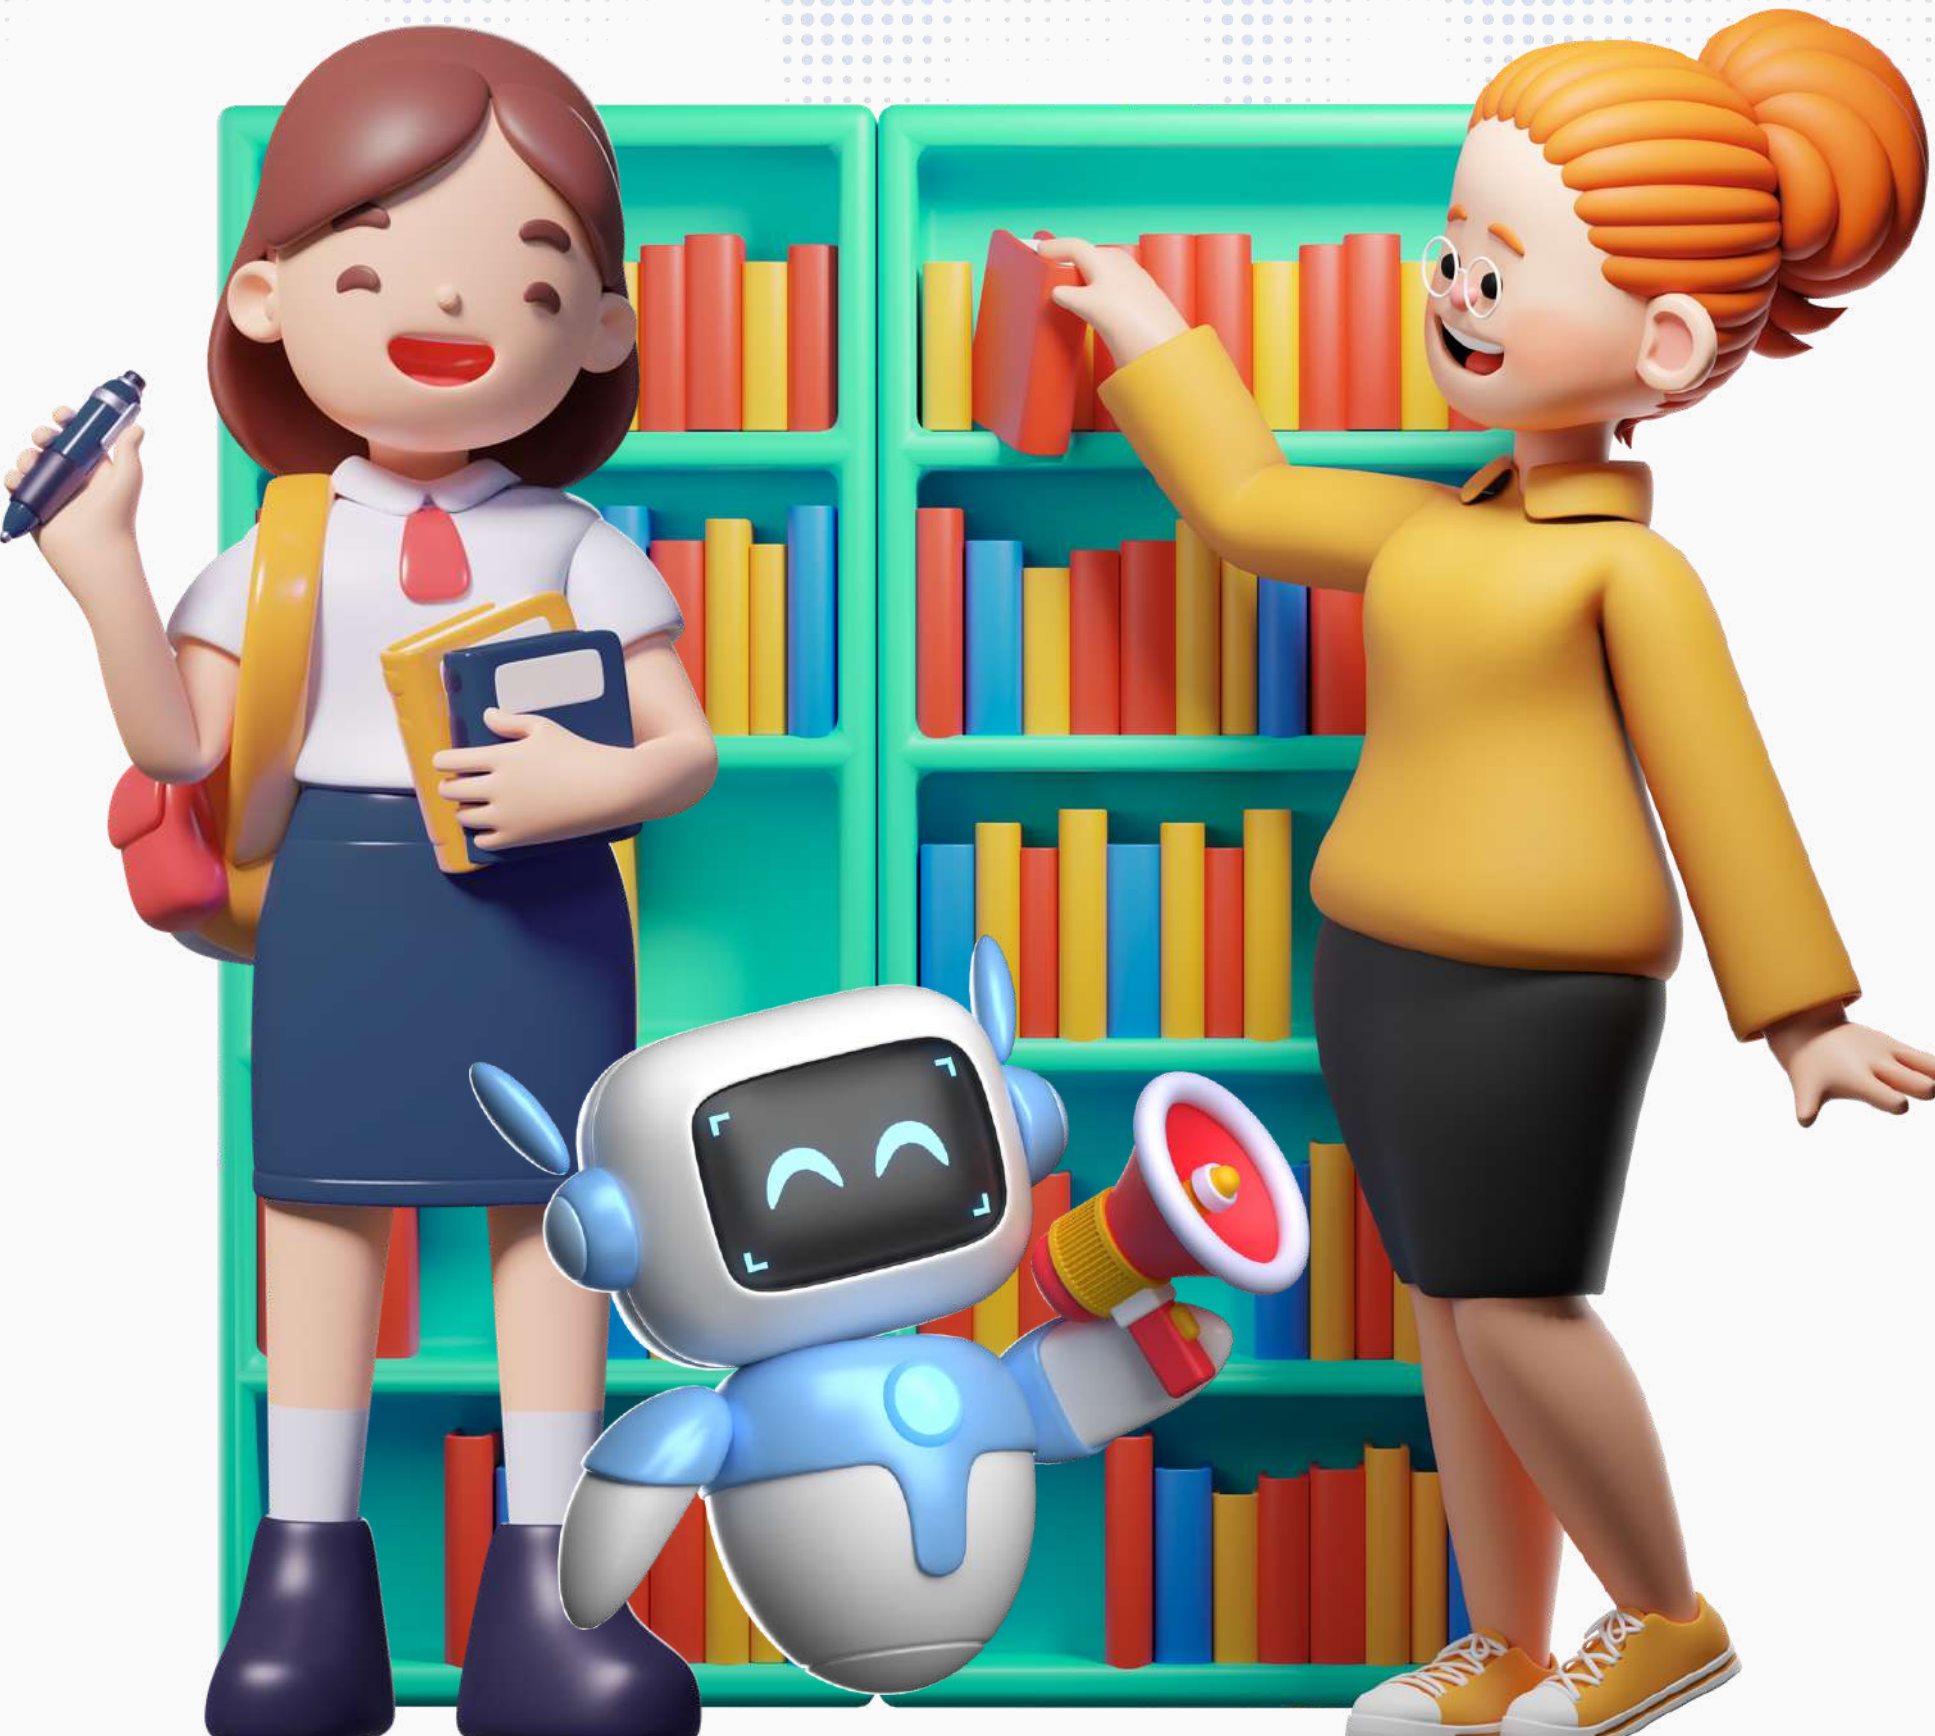

Students complete capstones based on real payment scenarios, not just theory-based assignments.

5. We support institutions

We provide trainers, curriculum, LMS support, assessment structure, certification support, outcome reports, and partnership pathways.

6. We respect academic authority

The partner institution retains full academic control. PPI supports delivery and industry alignment.

THREE-LAYER PROGRAM ARCHITECTURE

PPI programs are organised into three layers.

Each layer serves a different institutional and student need, from awareness to certification to curriculum embedding.

Layer	Purpose	Format
Intro	Awareness	Free Payments 101 Masterclass
Core	Certification	Paid, assessed, co-branded certificate programs
Pro	Institutional Embedded	Credit-linked electives, VACs, SECs, and semester programs

INTRO: PAYMENTS 101 MASTERCLASS

The Payments 101 Masterclass is the single entry-point program for every campus relationship.

It is a free 4-hour awareness program delivered across two sessions of two hours each.

The masterclass introduces students to the complete payments and fintech landscape, including the industry, technology, operations, compliance, business models, and career tracks.

This program is used as the campus entry point before moving interested students into Core certificate tracks.

A more detailed breakdown of topics and sessions can be provided if needed.

Parameter	Detail
Duration	4 hours
Format	2 sessions of 2 hours each
Audience	All streams – BBA, BCom, MBA, B.Tech, MCA, BCA
Cost	Free for the institution
Assessment	No assessment
Certificate	Certificate of Participation
Delivery	Offline on campus preferred; online via LMS also available
Delivered by	Payomatix domain trainer
Minimum batch	20 students

CORE: ASSESSED CERTIFICATES

Core programs are paid, assessed, co-branded certificate programs.

Each course maps to one job family, one student audience, and one practical career direction.

This means that these programs are designed around practical career pathways in the payments and fintech industry. Each pathway helps students understand not only what the role is called, but what the actual work looks like inside payment companies.

These programs are designed for students who want deeper domain readiness and a structured certification in payments and fintech.

All Core programs are assessed through MCQ, capstone project, and attendance.

Code	Program	Audience	Focus
B1	Certificate in Payment Technology & Integration	B.Tech / MCA / BCA	Global
B2	Certificate in Payment Operations & Reconciliation	BCom / BBA Finance	Global
B3	Certificate in Merchant Acquisition & Success	BBA / MBA Sales	Global
B4-IN	Certificate in Indian Payments Compliance & Regulation	MBA / LLB / BCom Law	India
B4-GL	Certificate in Global Payments Compliance & Licensing	MBA / LLB / BCom Law	Global
B5	Certificate in Fintech Product & Strategy	MBA / BBA Product & Strategy	Global

PRO: EMBEDDED PROGRAMS

Pro programs are designed for institutions that want payments and fintech education embedded into their academic structure.

These programs may be delivered as electives, value-added courses, skill-enhancement courses, or MBA-focused programs.

Credit assignment follows NCrf / ABC guidelines and remains the decision of the partner HEI.

Pro programs require a signed MoU and Academic Council approval where credit linkage is intended.

Code	Program	Format	Approx. Hours
C1	Semester Elective: Payments & Fintech	Open elective	~50 hours
C2	MBA Elective: Fintech Strategy & Market Readiness	MBA elective	~60 hours
C3	Value-Added Course: Digital Payments	VAC	22-32 hours
C4	Skill Enhancement Course: Digital Payments	SEC	22-32 hours

PPI PROGRAMS ARE DESIGNED TO SIT COMFORTABLY **WITHIN INDIA'S HIGHER EDUCATION FRAMEWORK.**

UGC 2024 Alignment

Programs support industry collaboration, skill-based learning, project-based learning, internships, assessment, and credit pathways.

NCrF Mapping

Eligible programs can be mapped to relevant NCrF levels to support recognition, academic structuring, and progression.

ABC Integration

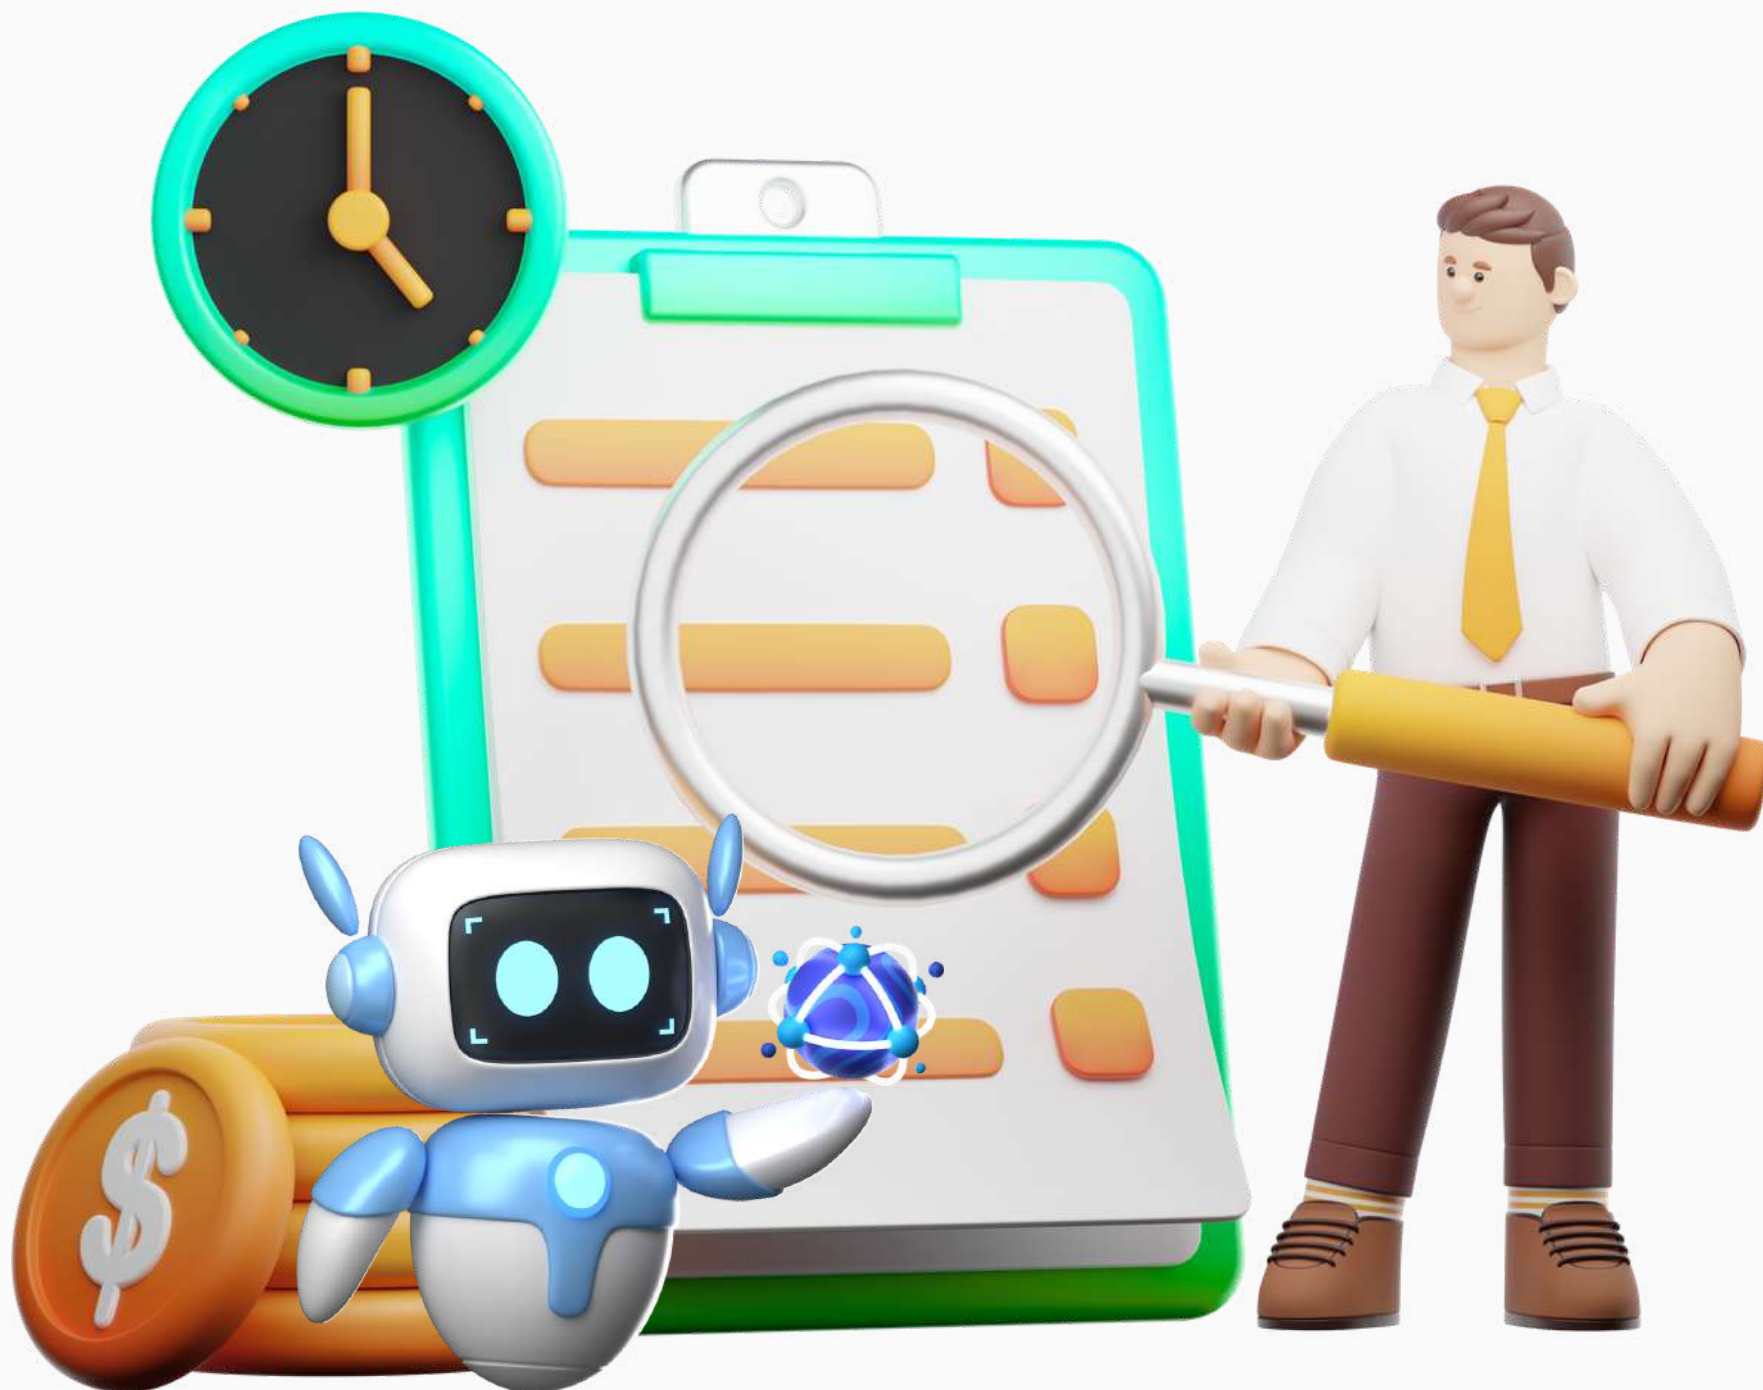

Where applicable, students can bank eligible credits through the institution-led Academic Bank of Credits framework.

Academic Authority

The partner HEI retains full and exclusive academic authority, including approvals, credit allocation, timetable integration, and academic council processes.

Compliance Principle

Payomatix does not grant degrees and does not conduct regulated payment operations as part of training delivery. PPI provides supporting documentation where required, while the HEI manages institutional approvals.

WE PROVIDE THE ACADEMIC DELIVERY SUPPORT REQUIRED TO RUN A SMOOTH, STRUCTURED COHORT.

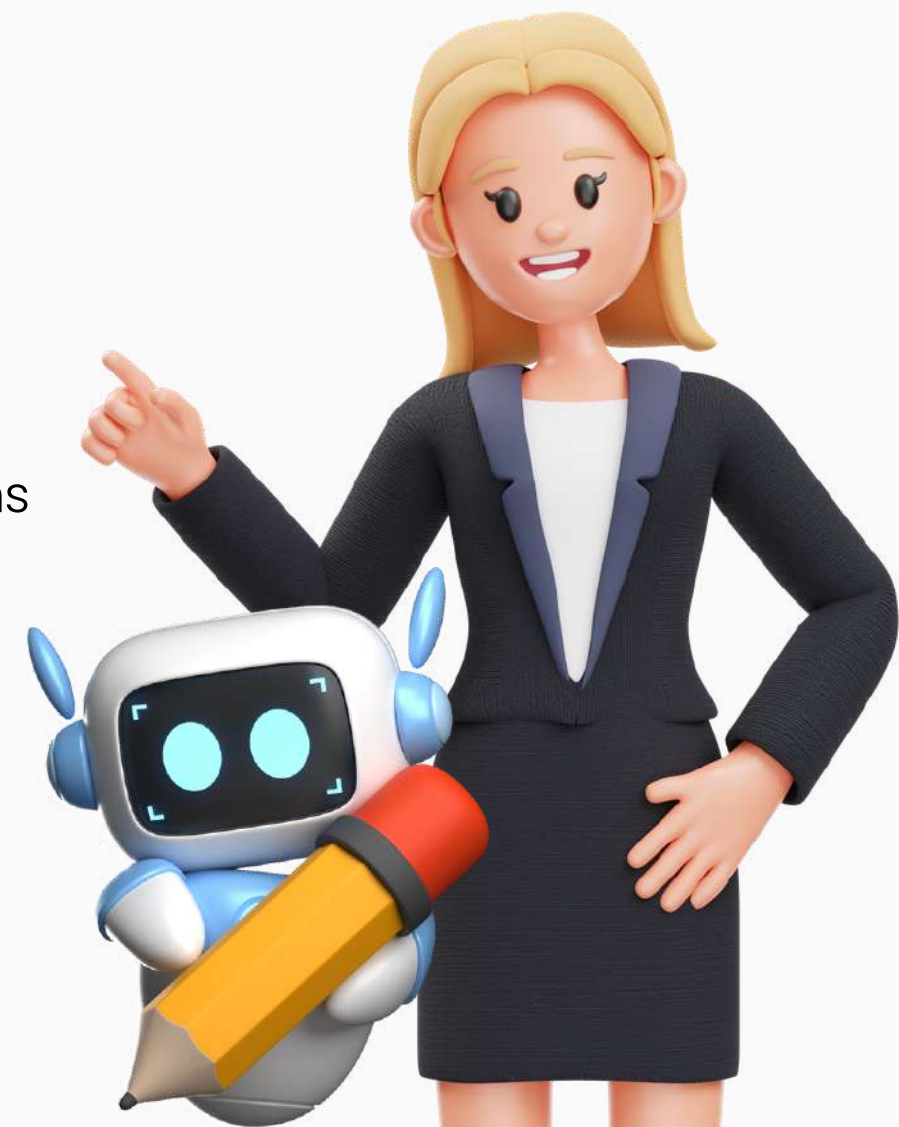

The delivery model is designed to be simple for the institution and valuable for students.

PAYOMATIX PROVIDES:

- Domain trainers
- Course content
- Session plans
- LMS setup and access
- MCQ assessment setup
- Capstone project structure
- Attendance tracking support
- Certification support
- Outcome reporting
- Student feedback collection
- Post-program review support

INSTITUTION PROVIDES:

- Student enrollment support
- Faculty coordinator
- Venue and infrastructure for offline sessions
- Timetable support
- Faculty panel support for capstone presentations
- Academic approvals where required
- Co-branding and certification coordination

www.institute.payomatix.com

+91 9776769666

RECOMMENDED FIRST STEP: ONE PILOT COHORT

We recommend beginning with one pilot cohort. No long-term commitment is required at the pilot stage.

The goal is to prove student value first.

This allows the institution to experience the program, evaluate student response, review outcomes, and decide the next step with clarity.

You can begin with:

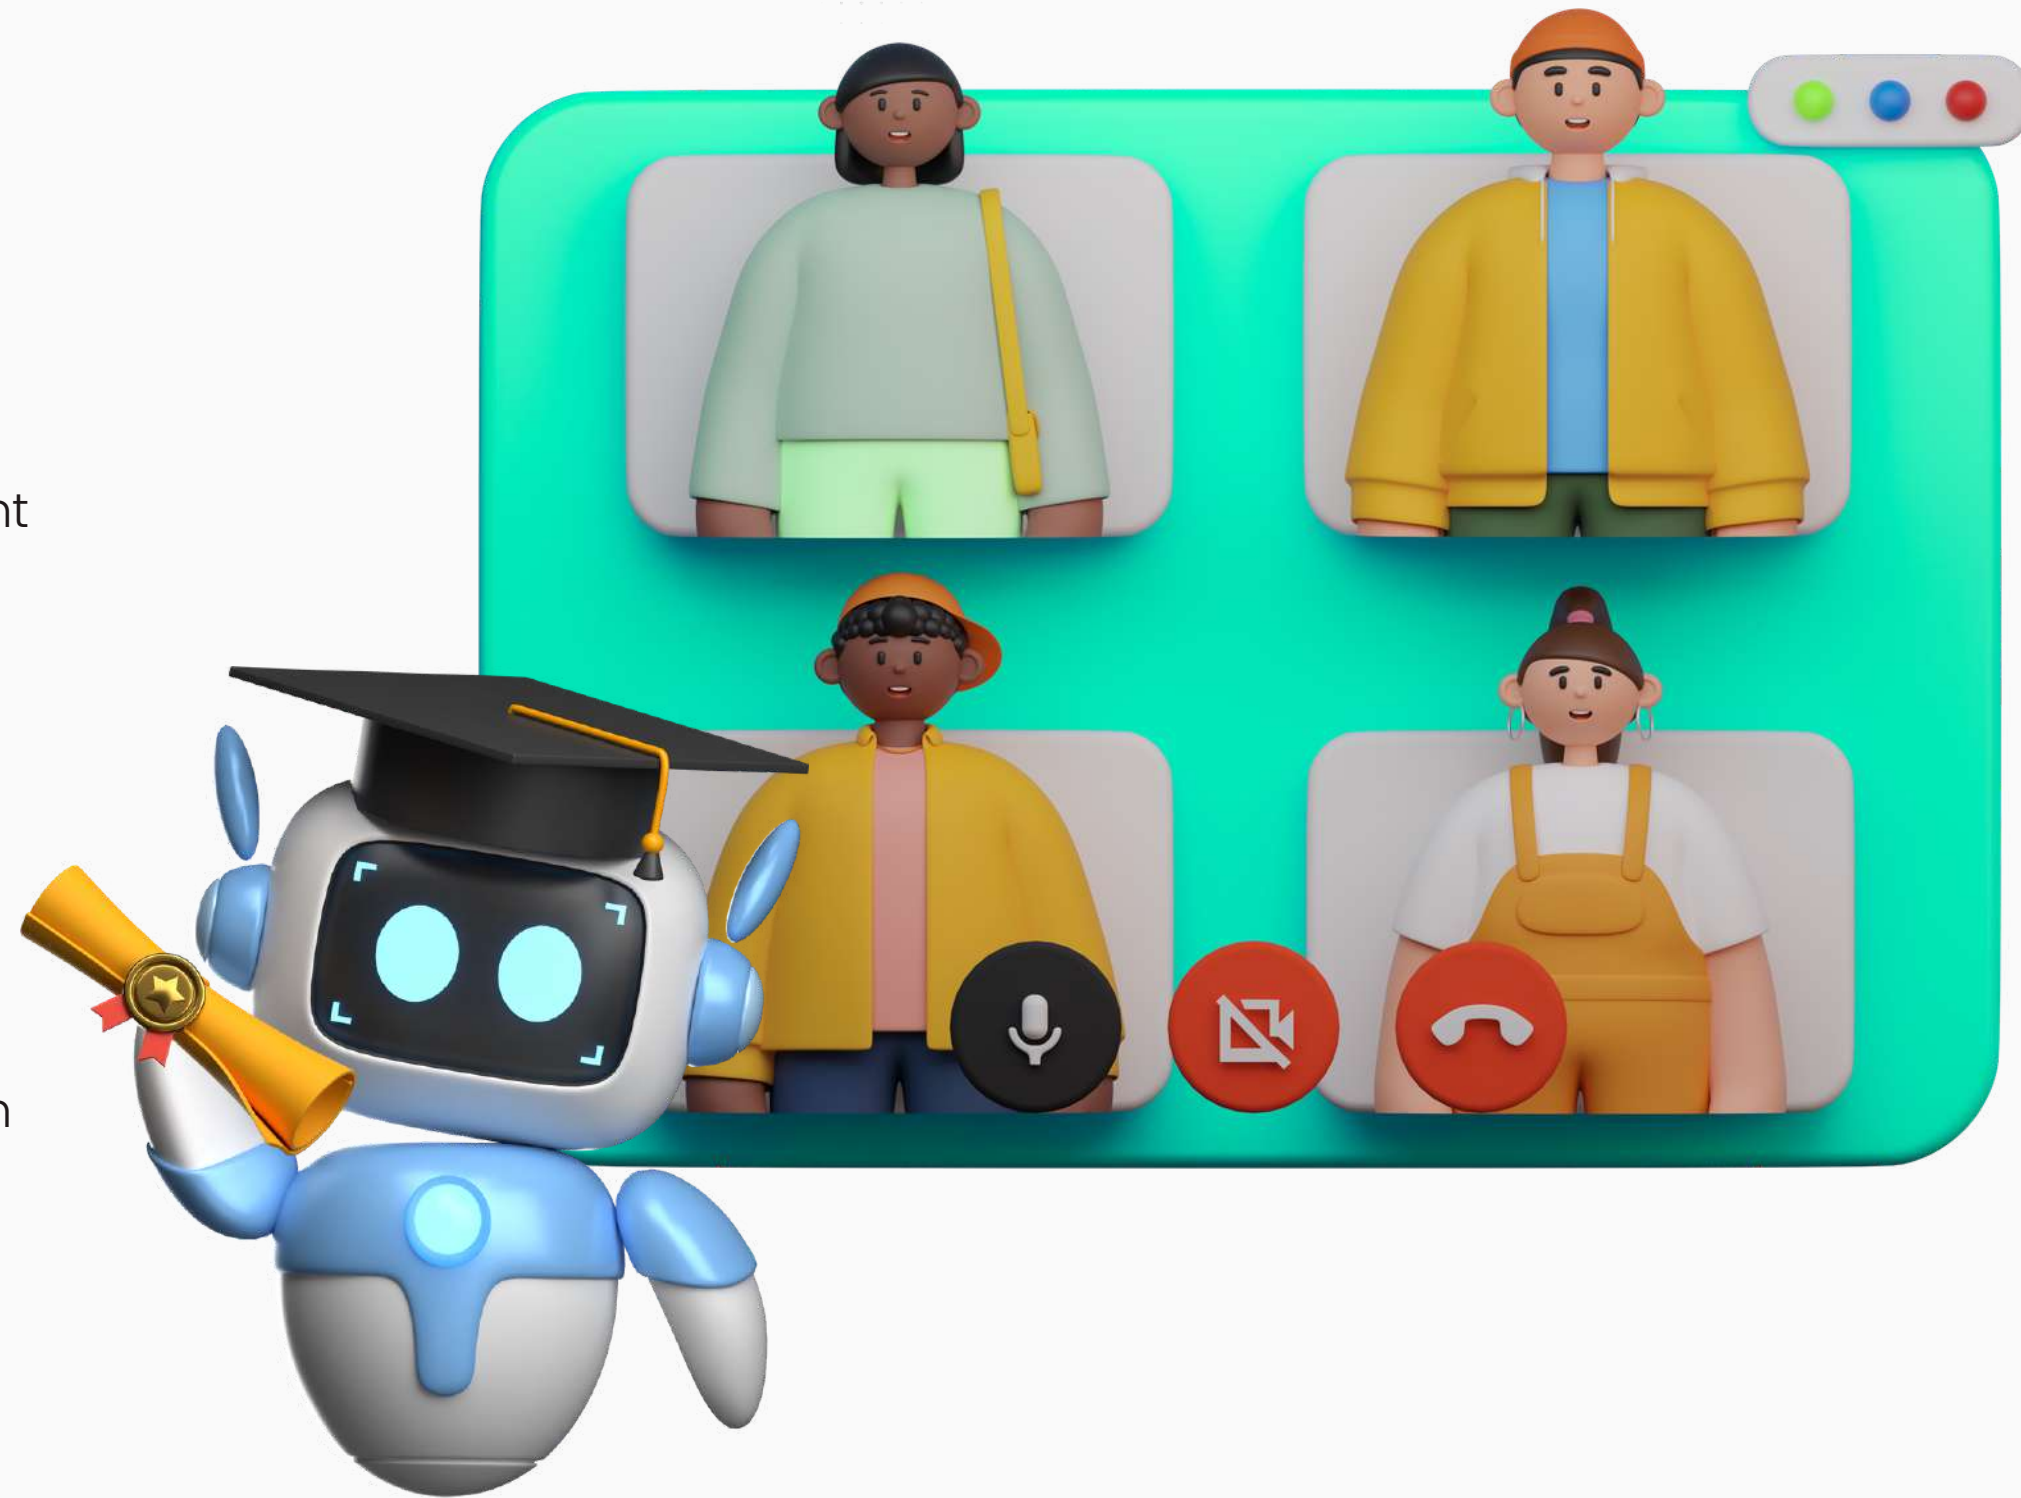

Option 1: Free Payments 101 Masterclass

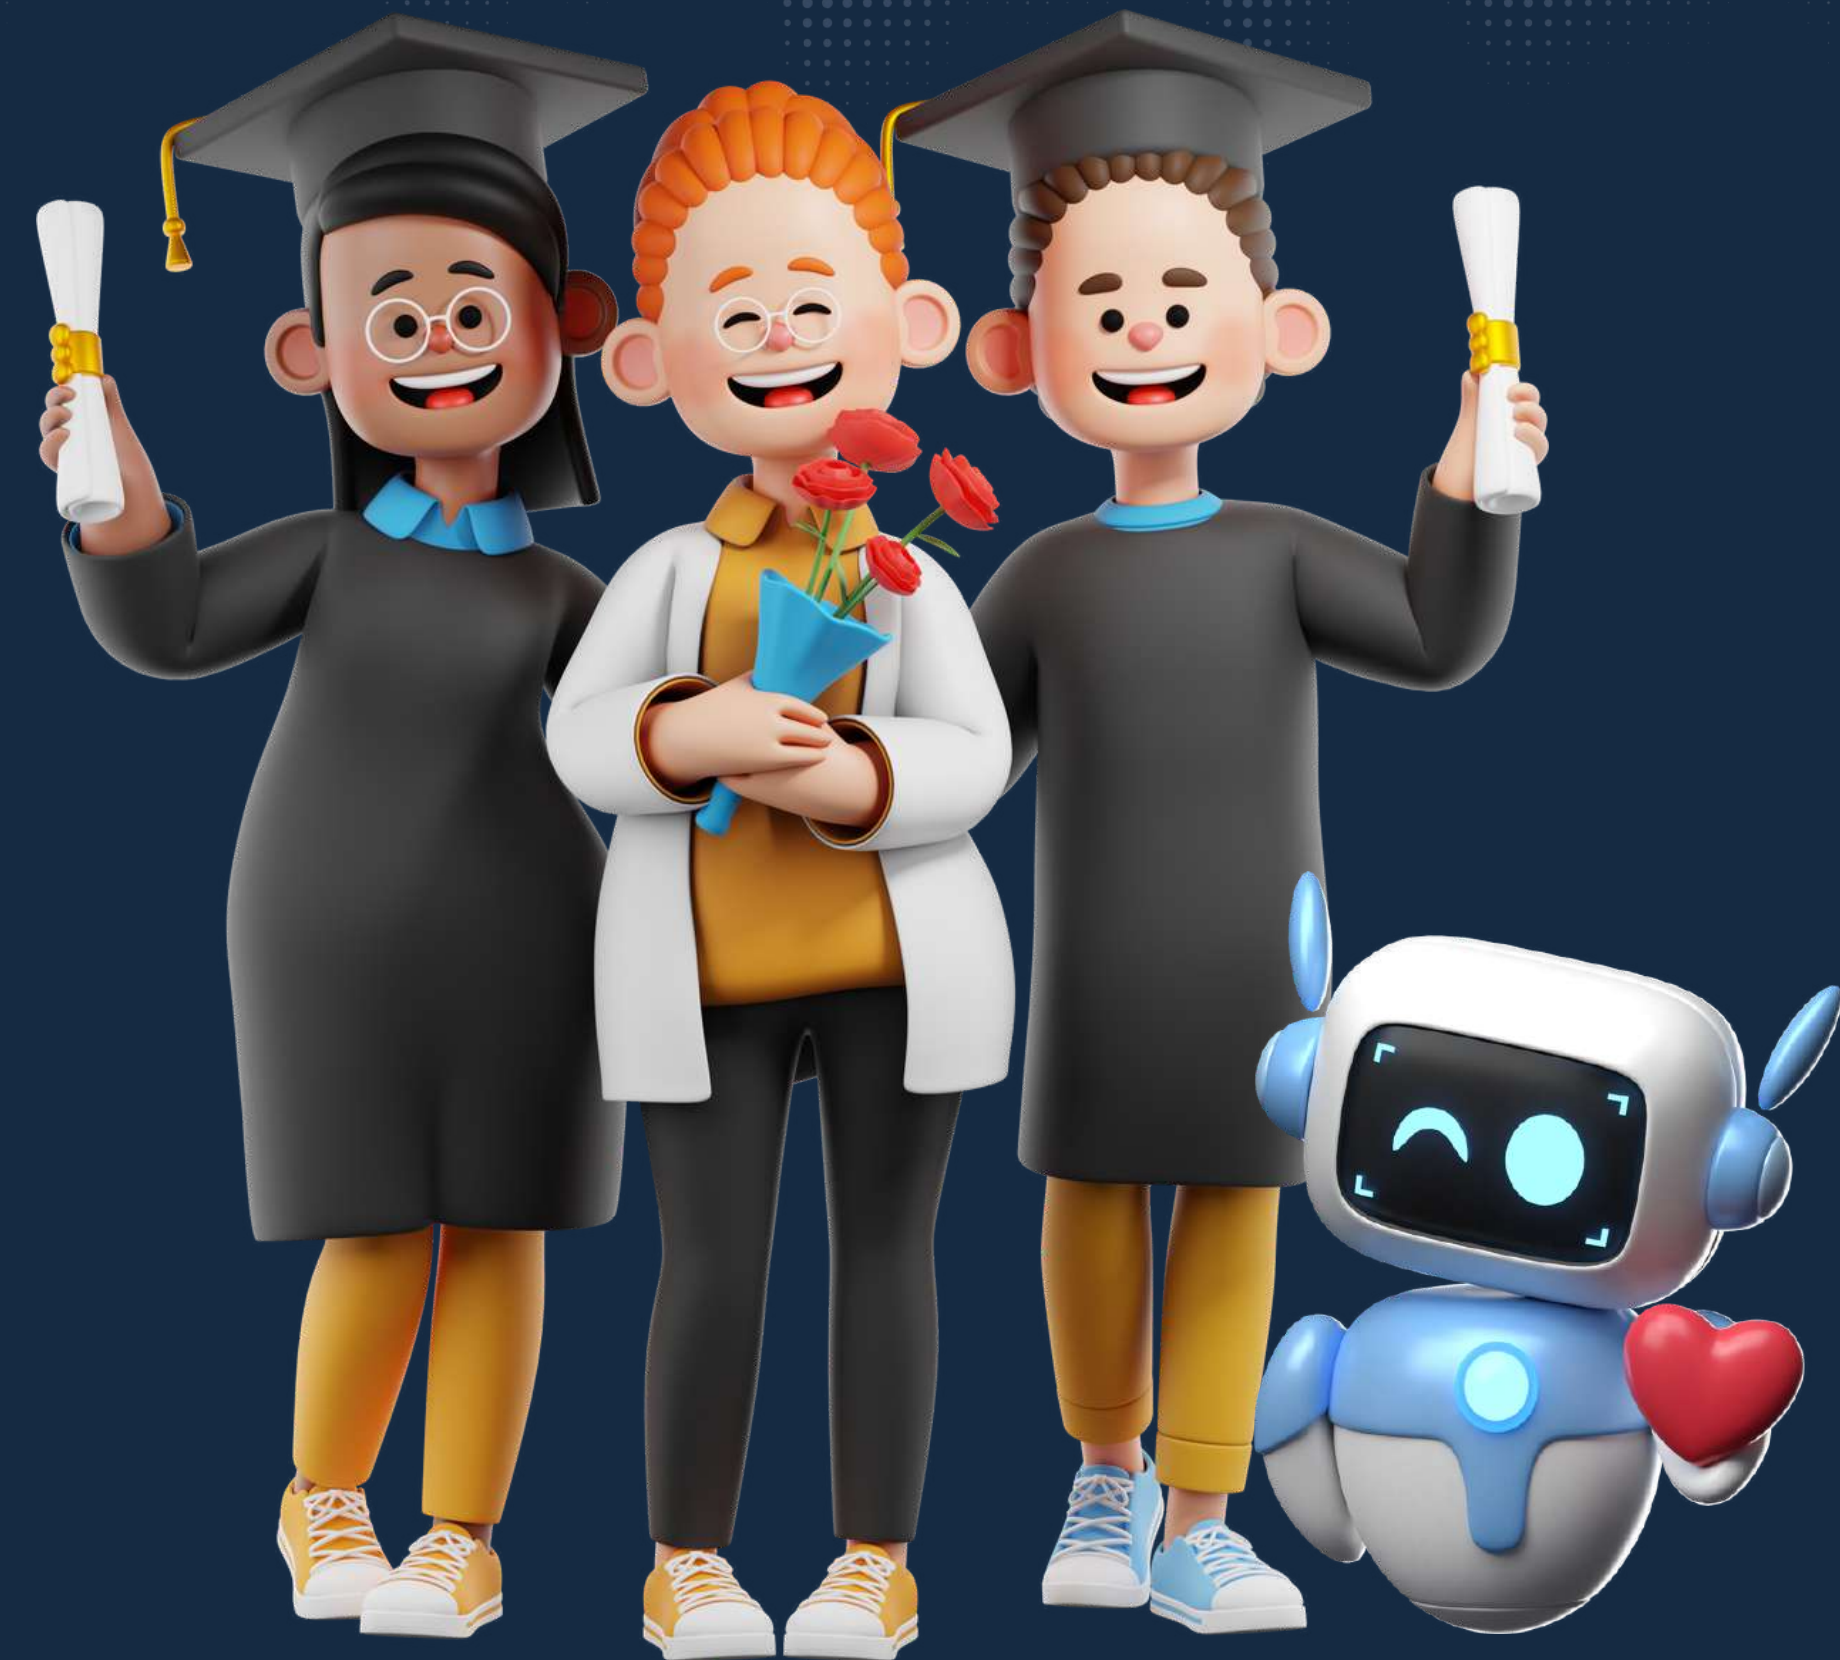

A 4-hour awareness session for students across streams.

Option 2: One Core Certificate Pilot

A structured, assessed, co-branded certificate cohort for a selected department.

Let us help your students understand how money moves, how fintech works, and where they can build their careers.

CLASS STARTS WITH CURIOSITY. **CAREERS START HERE.**

Let's build the future of payments — in class.
